PRECAUTIONARY
*** BOIL WATER NOTICE ***

Date: **November 19, 2026**

Due to a water main break today on **Balmville Lane**, the Town has issued a Precautionary Boil Water Notice. The following areas are affected by this notice:

Balmville Lane

We recommend that all water used from this supply be rapidly boiled for at least one (1) minute prior to use for either drinking or food preparation purposes. Another alternative is to use bottled water, certified for sale by the New York State Department of Health.

You should continue this practice until you receive notification from the Town of Newburgh Water Department.

Harmful microbes in drinking water can cause diarrhea, cramps, nausea, headaches, or other symptoms and may pose a special health risk for infants, some elderly, and people with severely compromised immune systems. But these symptoms are not just caused by microbes in drinking water. If you experience any of these symptoms and they persist, you should seek medical advice.

For more information about boil water events and using water for bathing, cooking, cleaning and other uses during these times see: www.health.ny.gov/environmental/water/drinking/boilwater/

If you have additional questions, please contact: The Town of Newburgh Water Department at 845-564-7813 or the Orange County Department of Health at 845-862-6201.

Please share this information with other people who drink this water, especially anyone who may not get this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

We apologize for the inconvenience.
