Subject: Lakeside Road Bridge/Town of Newburgh

Jim

We recommend going with one of the aluminum box culverts indicated below from Contech which are good for H25 and HS25. We would also need the headwalls but I think we can get away with using large stone placed as wingwalls. The four sided concrete box culvert would run over \$55,000. I suggest we do a field survey and base mapping of the site similar to what we did at North Fostertown so we can verify which culvert works best for this location. The cost for the survey and mapping, verifying the culvert selection and providing such in a letter to the Town with proposed invert elevations would be \$1600.

Let me know.

Joe
