Dear Mr. Brown:

In accordance with our general policy regarding the submission of applications and plans, we are placing the above mentioned plans in our inactive file for the following reasons:

1. That a filing fee of \$100.00 payable to the Orange County Department of Health must accompany the submission.
2. We need technical specifications.
3. Need to label plans "Water Main Extension to serve".

The normal time allotted for review will be considered to commence at the time the complete submission is in the possession of this office. This project may be considered dormant and/or be disapproved if the listed items are not received within sixty (60) days and the plans, engineer's report, specifications, or other data submitted may then be discarded, unless arrangements for retrieval are made by the engineer.

Very truly yours,

Edwin L. Sims, P.E.  
Principal Public Health Engineer
